

AURORA

Fruit and Flower Pigmentation Support

- Increased color pigmentation help
- Better flower and fruit quality
- Decreased harvest passes
- Cost effective
- Environmentally Safe

AURORA

0-13-16

GUARANTEED ANALYSIS	
Available Phosphate (P ₂ O ₅)	13.00%
Soluble Potash (K ₂ O)	6.00%
Magnesium (Mg)	0.50%
50% Water Soluble Magnesium (Mg)	
Sulfur (S)	1.00%
0.00% Combined Sulfur (S)	
Boron (B)	0.05%
Copper (Cu)	0.05%
1.05% Water Soluble Copper (Cu)	
Molybdenum (Mo)	0.05%
Zinc (Zn)	0.25%
1.25% Water Soluble Zinc (Zn)	

Derived From: Ammonium Molybdate, Boric Acid, Copper Sulfate, Magnesium Sulfate, Phosphoric Acid, Potassium Chloride, Potassium Phosphate, Zinc Sulfate.

VITAMIN SHOT FOR PLANTS

AURORA is a liquid fertilizer comprised of macro, secondary, and micronutrients that provide key elements that enable plants to develop vibrant colors in flowers and fruits, as well as vigorous sweetness in fruits. This unique blend of elements is designed to enhance the natural development of flowers and fruits to be vibrant and vigorous.

VITAMINS

WHY AURORA

Aurora provides the plant with the ability to intensify the pigmentation of fruits, vegetables, and flowers evenly.

Its formulation comprises essential macro and micronutrients that encourage the plant to reduce maturation while increasing the quality of the overall crop during flowering and fruiting.

Aurora works by providing nutrients that are key in the plants pathways to support increased synthesis of nutrients that are responsible for flower and fruit pigmentation development. Aurora is formulated to deliver these key essential nutrients allowing the plant to properly utilize and develop fully during peak nutrient times.

DIRECTIONS FOR APPLICATION

CULTURE	APPLICATION RATES	DILUTION RATIOS	FOLIAR SPRAY	TIMING & FREQUENCY
Fruit Trees of pip & stone	3.8 - 7.6 mL/ 1 gal 12.8 - 25.6 oz/ 100 gal	1:1,000 - 1:500	9.5 - 14.5 mL/ 1,000ft ² 416 - 625 mL/ Acre 1 - 1.5 L/ Ha	Make 1 - 2 applications during the time of flowering
Fruits, Peppers, Tomatoes, etc.	3.8 - 7.6 mL/ 1 gal 12.8 - 25.6 oz/ 100 gal	1:1,000 - 1:500	9.5 - 14.5 mL/ 1,000ft ² 416 - 625 mL/ Acre 1 - 1.5 L/ Ha	Make 1 - 2 applications during the time of flowering
Cultivation in general	3.8 - 7.6 mL/ 1 gal 12.8 - 25.6 oz/ 100 gal	1:1,000 - 1:500	9.5 - 14.5 mL/ 1,000ft ² 416 - 625 mL/ Acre 1 - 1.5 L/ Ha	Make 1 - 2 applications during the time of flowering

HOW IT WORKS

Aurora delivers macro and micronutrients in optimal formulation and ratios to encourage and enhance the plant to increase the color pigmentation while reducing the plants' stress. With the elimination of Nitrogen from the formulation, Aurora does not force the plant into a growth stage but encourages the plant to translocate the nutrients that are in limited availability to promote reduced stress and an increased color formation.
